SYNTHETIC DEMONSTRATION DOCUMENT - NOT A REAL ADVISORY

Gulf Shipping Risk Advisory No. 14 (illustrative)

Issued 4 November 2026 by a fictional regional shipping association for demonstration use.

Tanker transits through the Strait of Hormuz averaged 92 per day over the past week.

War-risk insurance premiums for Gulf transits rose to 0.7% of hull value, from 0.2% a month earlier.

Two vessels reported GPS interference near the traffic separation scheme on 2 November 2026.

Fujairah anchorage waiting time increased to 3.5 days for crude tankers.

Operators are advised to confirm routing plans and review insurance cover before transit.
